

1. MLP-based

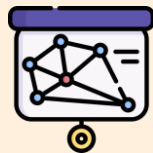

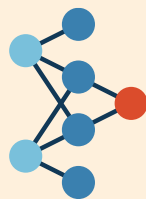

2. RNN-based

3. Transformer-based

4. CNN-based

5. GNN-based

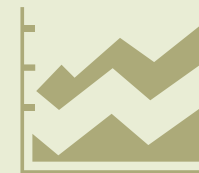

6. KAN-based

Models

1. Multi-temporal scale

2. Extreme Rainfall Events

3. Forecast Reliability and Accuracy

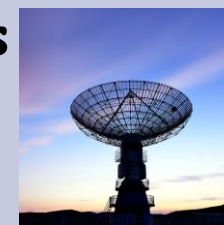

Data

1. Zero-Inflation

3. Lack of Discernible Periodicity

2. Derived from Latest Real-World Scenarios

4. Temporal Decay
